Preface

This bibliography on euthanasia represents a twenty year span (1958-1978) of references found in select indexes and abstracting services. The references will be found in Mullins Library and in various other libraries in the state (locations are given).

The general student may use the services offered by the Interlibrary Loan Department of Mullins Library for a minimum charge per article providing the article is not contained within Mullins' collection. Libraries, however, must operate under the copyright guidelines and the student should check with Interlibrary Loan before requesting several articles from the same journal.

We hope this bibliography, with locations provided, will enable the student to complete his research efficiently and effectively.
